

KEEP COLLABORATION MOVING EVERYWHERE YOU GO

Business doesn't stop when you're away from your desk. Whether commuting, traveling, or working remotely, you and your workers need a way to keep collaboration and communication moving forward.

Lightpath Unified Communications extends your Business Hosted Voice services to your laptops, desktops, tablets, and mobile devices, keeping you connected everywhere you go. Use our powerful platform to boost productivity across calls, devices, and locations with single-number convenience – all for one flat monthly fee.

SIMPLE SETUP

Just download and install our app from Google Play or the App Store.

VISUAL VOICEMAIL

Review, delete, and respond to voicemail and fax messages with a tap.

ONE-NUMBER CONVENIENCE

Send, receive, and transfer calls between devices, all from one number.

POWERFUL STATUS CAPABILITIES

Display your availability and check your coworker's statuses in real time.

UNIFIED COMMUNICATIONS FEATURES

Mobile Soft Phone

Make calls from 3G, 4G, or WiFi connections. Compatible with iOS and Android.

Desktop and Laptop Soft Phone

Make calls from your Windows or Mac OS X computer.

CRM Integration

Access contacts and data from your CRM applications, productivity tools, and Outlook.

Instant Messaging

Reach out to coworkers and get quick responses across all your devices.

Transfer Calls Between Devices

Seamlessly move your call to your laptop, tablet, or mobile device.

Mid-Call Features

Transfer, park, and hold calls even while you're on an active call.

Lightpath Unified Communications quickly and cost-effectively extends your existing Lightpath voice services for maximized productivity. Contact us to boost collaboration across your business today.
