

# TECHNICAL OVERVIEW

## FLEXIBILITY

### Applications

Lightpath Cloud Backup services support server-specific applications, including:

- Network shares
- All versions of SQL and Exchange
- SharePoint
- Active Directory
- COM+ services
- SYSVOL directory share
- Windows Registry database

### Mobile Access

Easily access your backup data on your mobile device by using our free app for iOS and Android.

### Operating Systems

Our services are compatible with a wide range of operating systems, including:

- Windows 8.1, 8.0, 7, and Vista; Server 2012 and 2008
- Mac OS X 10.9, 10.8, 10.7, and 10.6
- Linux distributions, including CentOS, Debian, Fedora, Red Hat and Ubuntu
- VMware vSphere 5.5 and 6.0
- Windows Hyper-V

### Open & Locked File Support

Secure all your files, including Outlook PST files, even if you're making changes, pausing backup, or rebooting the machine.

## SECURITY

### Industry Audits & Certifications

Lightpath Cloud Backup services have been SSAE 16-audited and ISO 27001-certified.

### Secure Data Centers

Our servers are guarded around the clock by gated perimeters, surveillance cameras, and on-site technicians.

### High-Tech Encryption

Every file is protected before, during, and after transfer with AES-256 military-grade encryption.

### Local & Cloud Backup

Mozy 2xProtect provides more protection by automatically backing up files to an external drive and to the cloud.

## SIMPLICITY

### Custom Control

Choose from automatic or scheduled backups, in addition to customizable settings for bandwidth, speeds, and file types.

### Headache-Free Billing

We offer simple, flat monthly pricing with all your Lightpath services on one easy bill.

### Easy Scalability

Pricing is based on storage size, so there's no limit on how many servers and devices you can connect.
