# TOP FEATURES AND BENEFITS OF WEB CONFERENCE

**Personal Meeting Room** – Customize your meeting URL by creating a room name and conducting all of your meetings from this single, on-demand meeting room.

**Video Integration** – Use a webcam to share live video with participants from the meeting interface.

**Share Presentations** – Upload and share PowerPoint right from your computer to audiences around the world.

**Application Sharing** – Demonstrate and share any software or application from your desktop to remote audiences – it's firewall friendly.

**Integrated Audio** – For large meetings, mute background noise with the integrated audio features and utilize the active speaker icons to see who is talking.

**Recording** – Capture both the call and the web meeting in one file, so that others may view the recording later in just one click.

**Collaboration** – Create a truly interactive meeting with chat, Q&A, Web tour, polling and virtual whiteboard features.

**Participant Controls** – Receive participant feedback as attendees set their status/mood or the raise hand feature.

**File Transfer** – Make supplementary handouts, images or spreadsheets available for download before, during, or after a conference.

**Live Help** – Live customer support and technical advice at the push of a button during live conferences, or anytime you're logged in.
